

Ratnaji Guptha Talluri S G Kameswara

Guptha has delivered impactful improvements across multiple areas, including reducing World Tariff Web Services deployment time from over 4 hours to just 1.5 hours with zero downtime, and automating the Jetro usage report generation, cutting processing time from hours to minutes. He streamlined internal application access by eliminating manual tasks. His efforts in security led to a reduction of TT and WT vulnerabilities from over 50,000 to 1,500, significantly enhancing compliance. Additionally, he improved SSL certificate management by introducing proactive tracking, ensuring timely renewals and complete visibility.
