

TALLURI S G KAMESWARA RATNAJI GUPTHA

Phone: 9515075955 | Email: ratnaji.guptha@gmail.com | Location: Hyderabad, India

PROFESSIONAL SUMMARY

Full Stack Developer with 4.5 years of experience in designing, modernizing, and optimizing enterprise applications using Java, Spring Boot, and Angular. Delivered impactful improvements including reducing deployment times by 62.5%, automating reporting processes, eliminating manual workflows, and reducing security vulnerabilities by 97%. Proven expertise in microservices migration, production stability, security remediation, and Agile/SAFe delivery with multiple awards for operational excellence.

PROFESSIONAL EXPERIENCE

Full Stack Developer

FedEx Express | Hyderabad, India | April 2024 – Present

- Own end-to-end development of enterprise-grade applications, driving features from requirements to production with high reliability and on-time delivery
- Design and implement scalable system architectures, improving performance, maintainability, and fault tolerance across distributed microservices
- Build and optimize high-throughput REST APIs using Java and Spring Boot, reducing response times, and improving system efficiency under peak loads
- Lead performance optimization initiatives by identifying bottlenecks and tuning services, significantly enhancing application responsiveness
- Collaborate with cross-functional teams and stakeholders to translate complex business requirements into scalable technical solutions
- Improve system reliability and up time by proactively resolving production issues, implementing robust monitoring, and alerting mechanisms
- Manage infrastructure setup, deployment pipelines, and environment configurations, ensuring smooth and stable releases
- Enforce engineering best practices including code reviews, testing strategies, and clean architecture principles to maintain high code quality
- Onboard applications to Splunk and AppDynamics with real-time alerts, reducing MTTR and improving incident response
- Resolve critical issues under tight SLAs, ensuring 99.9%+ application availability
- Reduce infrastructure and application vulnerabilities from over 50,000 to 1,500 (97% reduction), significantly enhancing compliance and security posture across critical systems

Software Engineer

Persistent Systems | Hyderabad, India | February 2022 – April 2024

- Conducted requirement analysis and deployed enterprise-level applications using Java and Spring Boot
- Developed and optimized features, ensuring high availability and resolving critical production issues
- Designed and implemented feedback services using Angular and Spring Boot, enhancing user experience
- Debugged application code and resolved performance bottlenecks using Eclipse and IntelliJ IDEA
- Authored and maintained technical documentation to support team collaboration via Confluence
- Streamlined deployment processes with Spring Cloud Config and participated in Agile sprints to deliver features on time
- Facilitated effective collaboration with developers using Git for version control, ensuring streamlined coordination and proficient project management

TECHNICAL SKILLS

- **Programming Languages:** Java, TypeScript, JavaScript, HTML5, CSS3, SQL
- **Backend Technologies:** Spring Boot, Microservices, REST APIs, Hibernate, Spring Data JPA, Spring Cloud Config
- **Frontend Technologies:** Angular, TypeScript, HTML5, CSS3
- **Databases:** Oracle SQL
- **Testing Tools:** JUnit, Mockito, JMeter
- **DevOps/Tools:** Git, GitHub, Maven, Postman, Swagger
- **Monitoring & Logging:** AppDynamics, Splunk
- **Core Concepts:** System Design, SOLID Principles, Microservices Architecture, Agile/SAFe
- **AI & Developer Productivity Tools:** GitHub Copilot, ChatGPT, Microsoft Copilot

EDUCATION

Bachelor of Technology (B.Tech) – Electrical and Electronics Engineering

Kakinada Institute of Engineering and Technology | Kakinada | June 2018 – October 2021 | CGPA – 6.97

Diploma in Electrical & Electronics Engineering (EEE)

Kakinada Institute of Engineering and Technology | Kakinada | June 2015 – March 2018 | Percentage – 77

KEY ACHIEVEMENTS

Bravo Zulu Award – Deployment Optimization and Security Remediation

- Optimized deployment process, cutting time from 4+ hours to 1.5 hours with no downtime.
- Automated application usage report generation, cutting processing time from hours to minutes
- Streamlined one of our application access processes by eliminating manual tasks.
- Reduced infra and application vulnerabilities from over 50,000 to 1,500, significantly enhancing compliance
- Introduced initiative-taking SSL certificate tracking, ensuring timely renewals and complete visibility

Bravo Zulu Award – Regulatory Adaptability

- Recognized for adaptability, creative solutioning, and bias to action in overhauling processes to meet evolving regulatory requirements
- Contributed to stabilizing global footprint while delivering meaningful value for customers and shareholders through strong cross-functional partnership

PPQ Award – Outstanding Performance

- Recognized for outstanding Quality-Driven Management performance on the Electronic Export Information (EEI) Automation project, enhancing customer experience at FedEx
