PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 4.5+ years of experience designing, building, and optimizing enterprise-grade applications using Java, Spring Boot, Angular, and microservices architecture. Delivered measurable impact including 62% reduction in deployment time, 97% reduction in security vulnerabilities, and 99.9% application uptime. Adept at leading performance optimization, security remediation in Agile/SAFe environments. Recognized with multiple awards for operational excellence.

TECHNICAL SKILLS

- **Programming Languages:** Java, TypeScript, JavaScript, SQL, HTML5, CSS3
- **Backend Technologies:** Spring Boot, Microservices, REST APIs, Hibernate, Spring Data JPA, Spring Cloud Config
- **Frontend Technologies:** Angular, TypeScript, HTML5, CSS3
- **Databases:** Oracle SQL
- **Testing Tools:** JUnit, Mockito, JMeter
- **DevOps/Tools:** Git, GitHub, Maven, Postman, Swagger
- **Monitoring & Logging:** AppDynamics, Splunk
- **Core Concepts:** System Design, SOLID Principles, Microservices Architecture, Agile/SAFe
- **Security:** Okta, OAuth 2.0, SSL/TLS, Vulnerability Remediation
- **AI & Developer Productivity Tools:** GitHub Copilot, ChatGPT, Microsoft Copilot

PROFESSIONAL EXPERIENCE

FedEx Express | Full Stack Developer | Hyderabad, India | April 2024 – Present

- Architected and distributed 5+ enterprise-grade applications end-to-end, driving features from requirements to production with 99.9% uptime and zero critical post-release defects.
- Designed scalable microservices architecture across 10+ distributed services, reducing inter-service latency by 40% and improving fault tolerance with circuit breaker patterns.
- Built and optimized high-throughput REST APIs using Java and Spring Boot, reducing average response time by 45% and handling 50,000+ daily transactions.
- Streamlined client application access by consolidating multiple authorization layers into a single enterprise role-based model using Okta, reducing login friction by 70% and eliminating redundant auth configurations.
- Decreased infrastructure and application vulnerabilities from 50,000+ to 1,500 (97% reduction), enhancing compliance and security posture across 8 critical systems
- Automated deployment pipeline for World Tariff Web Services, cutting deployment time from 4+ hours to 1.5 hours with zero downtime.
- Implemented proactive SSL certificate tracking system across 20+ applications, ensuring timely renewals and eliminating expiration-related outages.
- Onboarded 6 applications to Splunk and AppDynamics with real-time alerting, reducing Mean Time to Resolution (MTTR) by 35%.
- Resolved 50+ critical production issues under tight SLAs, maintaining 99.9% application availability across all managed services.
- Enforced code quality standards through structured code reviews and testing strategies, achieving 85%+ code coverage and reducing production defects by 40%

Persistent Systems | Software Engineer | Hyderabad, India | February 2022 – April 2024

- Developed and deployed 5+ enterprise applications using Java and Spring Boot, serving 10,000+ end users with 99.5% uptime.
- Built a feedback microservice using Angular and Spring Boot that processed 5,000+ submissions monthly, improving user satisfaction scores by 25%.
- Identified and resolved 30+ performance bottlenecks across application stack, reducing average API response time by 35%.
- Streamlined deployment processes using Spring Cloud Config, reducing release cycle from 2 weeks to 3 days with 95% sprint delivery rate.
- Collaborated with a cross-functional team of 8 developers, managing 100+ pull requests and maintaining zero merge conflicts in production.
- Authored and maintained technical documentation on Confluence, reducing onboarding time for new developers by 40%.

EDUCATION

Bachelor of Technology (B.Tech) – Electrical and Electronics Engineering

Kakinada Institute of Engineering and Technology | Kakinada | June 2018 – October 2021 | CGPA – 6.97

Diploma in Electrical & Electronics Engineering (EEE)

Kakinada Institute of Engineering and Technology | Kakinada | June 2015 – May 2018 | Percentage – 77

CERTIFICATIONS

- Certified SAFe 6.0 Practitioner - Scaled Agile, Inc.

RECOGNITIONS & ACCOMPLISHMENTS

Bravo Zulu Award – Deployment Optimization and Security Remediation

- Reduced deployment time from 4+ hours to 1.5 hours with zero downtime, saving 10+ engineering hours quarterly.
- Automated report generation processes, cutting processing time from hours to minutes.
- Eliminated manual application access workflows, improving team productivity by 30%.
- Lowered vulnerabilities from 50,000+ to 1,500 (97% reduction), achieving full regulatory compliance.

Bravo Zulu Award – Regulatory Adaptability

- Overhauled end-to-end processes at speed to adapt to new tariff policies and De Minimis regulatory changes, ensuring zero disruption to global operations
- Partnered across Operations, Data & Tech, and FedEx Logistics to stabilize global footprint while delivering measurable value for customers and shareholders.
- Recognized for adaptability, creative solutioning, and bias to action in navigating complex regulatory shifts with no compliance gaps.

PPQ Award – Outstanding Performance

- Recognized for quality-driven delivery on the Electronic Export Information (EEI) Automation project, enhancing customer experience and reducing manual processing by 60%
